UCSD Extension

BFA in Motion Pictures/ Television
Academy of Art University

PROJECTS

PLANT PARENTHOOD   **Repository:** *github.com/Zuzanav/plant-parenthood*
Live Site: *plantparenthood.herokuapp.com*

- **Summary:** A web app that allows users to discover new plants ideal for their lifestyles, manage their plant's watering schedule and share their plant pics to a social feed.
- **Responsibilities:** Design of the entire app, responsiveness, styling including color palette and fonts. App displays watering schedule & frequency for each plant.
- **Languages and Tools:** React, Node, Mongo, HTML, CSS, Firebase, Auth0, Material-UI

CART-TO-KITCHEN   **Repository:** *github.com/Zuzanav/cart-to-kitchen*
Live Site: *zuzanav.github.io/cart-to-kitchen/*

- **Summary:** A web app that allows users to search, browse, save and view recipes. Save ingredients from individual recipes to a grocery list and find the closest grocery store.
- **Responsibilities:** Recipe page displays selected recipe to user. Selected ingredients from page sent to Firebase to then be retrieved by the grocery list. General styling and layout of entire app.
- **Languages and Tools:** JavaScript, jQuery, HTML, CSS, Firebase, Spoonacular API, Google Maps API.

STARSHIP SCHEDULER   **Repository:** *github.com/Zuzanav/train-scheduler*
Live Site: *zuzanav.github.io/train-scheduler/*

- **Summary:** A Star Trek themed web app that allows the user to add a starship to the schedule. Ship time and frequency is converted into a next arrival date and distance away in minutes using a combination of mathematical equations and Moment JS.
- **Responsibilities:** Building the entire app including design, styling, sending and retrieving calculations from Firebase and using Moment JS to display correct times.
- **Languages and Tools:** JavaScript, jQuery, Moment JS, HTML, CSS, Firebase, Moment.js
